

ABSTRACT OF THE DISCLOSURE

This invention includes a method and system for viewing data comprising detecting visual markers within view of a wearable camera worn by a human worker, and displaying data associated with at least one of those visual markers on a see-through wearable display worn by the operator.

Another aspect of the invention provides a method and system for coordinating movement of human workers comprising detecting one or more visual markers within view of a camera worn by the worker, and determining the location of the worker from the stored location of the visual marker within view of the camera.
